**DEALING WITH SUN GLARE:** As the summer sun rises higher and shines brighter, drivers face a seasonal hazard that's often underestimated—**sun glare**. Sun glare can significantly reduce visibility and increase the risk of accidents. Here's what you need to know to stay safe on the road. Sun glare occurs when the sun is low on the horizon—typically during early morning or late afternoon—and its rays hit your windshield at just the right (or wrong) angle. This can temporarily blind drivers, obscure traffic signals, and make it difficult to see pedestrians or other vehicles. **Safety Tips for Drivers:** **Wear Polarized Sunglasses** to reduce glare and improve contrast. **Use Your Sun Visor** to block direct sunlight from your eyes. **Keep**

**Your Windshield Clean** of dirt, streaks, and smudges, clean both the inside and outside regularly. **Slow Down and Increase Following Distance** to allow more time to react. **Keep a Microfiber Cloth Handy** for a quick wipe of the inside windshield before your route which can make a big difference in visibility.

**BAY SHORE ARTS FESTIVAL:** Stop by on Sunday, June 8th and visit the **Suffolk Transportation team** at one of Bay Shore's most vibrant annual events! The **Arts Festival by the Bay** transforms downtown into a lively celebration of creativity and community with Live music & performances, Art demonstrations & over 100 artisan vendors.
